

The Ivy House

Intelligent Lighting

Intuitive lighting control to enhance your home

Lutron can enhance the beauty of your home by allowing you to create the lighting effect for the right occasion and room with fingertip control. Lutron lighting systems also have the added benefit of saving you money - dimming lights uses less electricity and the soft start extends light bulb life.

The cost effective and easy to use solution

TELUME

Telume offers the ideal entry level and retro-fit solution. Fitting or replacing the existing light switch with a Telume, the lighting can be dimmed via the keypad with subtle LED status display. The Telume offers an infra-red remotecontrol as well as keypad control.

Solutions start with the Telume, and range up to the Grafik Eye and through to the sophisticated HomeWorks systems.

GRAFIK EYE

Grafik Eye permits combinations of different types of lights in various positions (ceiling, wall, floor & pelmet lights etc.) to be set at different intensities. They can be set and recalled as scenes via remote control or keypad at the touch of a button. Grafik eye is the ideal partner for a home cinema system adding real drama to the experience

Whole house lighting control and more

Lutron HomeWorks is a sophisticated whole house lighting control system - the whole house lighting can be controlled from a single point anywhere in the home. The push of a single button will light a 'pathway' up to the bedroom automatically turning off all the lights in the house behind you. The system features advanced home automation control and integration and can even be programmed to activate automatically from sunset to sunrise, opening and closing the curtains and activating the lights to welcome you home. It can even record your lighting habits and recall them while you are away on holiday giving the appearance your home is occupied.

A HOME FOR MUSIC & MOVIES

The Ivy House offers a complete design and installation service to Architects, Designers, Developers and the Homeowner.

Multi-room audio solutions | Home cinema rooms | Intelligent lighting | Automation & control | Bespoke furniture | Communications networks

The Ivy House

Intelligent Lighting

Add real drama to the home cinema experience

Living room and home cinema: Here the room is shown with full daylight and so all lights are set to low

Movie Time: Most lights are low or off for best viewing of the movie. But some lights are preset at low for accents and visibility etc.

General activity: All lights are preset to full on or near full for activities and tasks that require more light in a room

Reading and music listening: Light focussed on the seating is preset for reading and listening to music, while the rest of the lights in the room are set at lower levels to create a relaxed mood

Simple, discrete keypads and remote controls allow you to call up programmed lighting scenes. Lighting your home to enhance your mood and activity.

Keypads are available in a large range of styles, colours and finishes to co-ordinate with the most discerning interior
